

Minutes of Meeting - 05/19/2019

Attendees: Nandan Parikh, Prateek Malhotra and Tanmay Chinchore

Tasks Progress:

- 1) Shell Script written for extracting git metadata
- 2) Call graph library working and tested on small and medium scale project
- 3) Survey on which open source to perform analysis on?

Pressing Questions:

- 1) How to treat XML and other config files? (Excluding .java)
- 2) How to deal with merge commits when authors merge?
- 3) How to link our project to the research questions?
- 4) Distance between nodes in a graph (Name of the graph?)

Pending Tasks:

- 1) Push updates to GitHub
- 2) Try out 3 or more different call graph techniques and choose one of the approaches based on merit
- 3) Refer to related work and define the delta precisely
